

Instructions for Lens Replacement

Remove adjustment plate with mirror assembly

Ensure that the area where the lens seats is clean and smooth so that the lens will sit flat

Invert unit and place the lens in its location with the convex side out

Apply a small amount of ABS cement, or other suitable household cement, to the retainers and place against the inside wall of the unit and the lens in a way that fastens the lens in place

Allow the cement to cure according to manufacturers instructions

Reassemble the mirror adjustment plate
